

IPCO FLASHING SYSTEM DETAILS

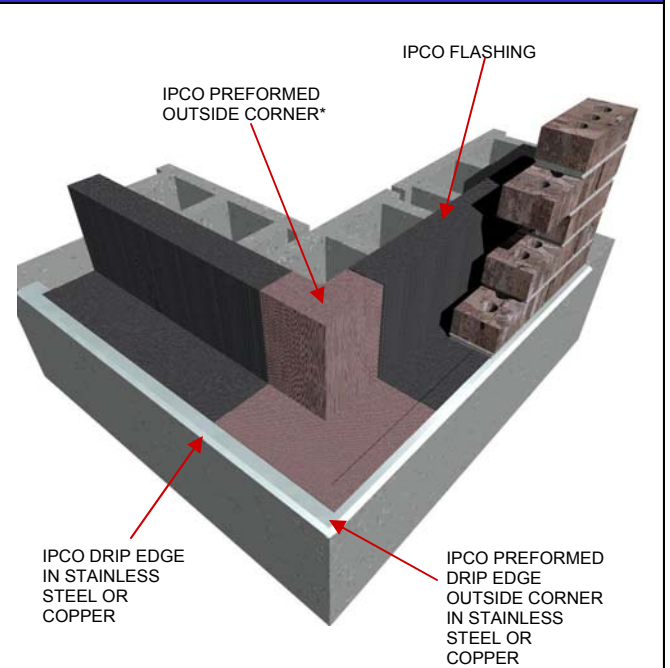

The IPCO FLASHING SYSTEM easily adapts to the most problematic of flashing conditions in masonry walls. The self-adhesive properties of IPCO Flashing creates a continuous moisture barrier to protect the structure.

PREFORMED INSIDE CORNER

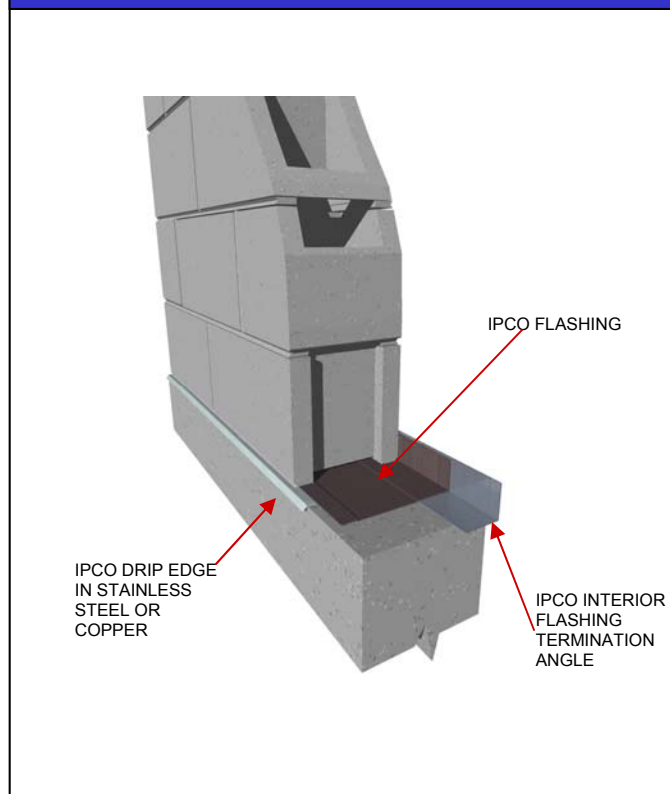

*NOTE: The actual preformed inside corner is shown here on top of the flashing for clarity. Actual installation should be under the flashing membrane.

PREFORMED OUTSIDE CORNER

*NOTE: The actual preformed outside corner is shown here on top of the flashing for clarity. Actual installation should be under the flashing membrane.
