3. Product Description

The IPCO Preformed End Dam in stainless steel is specifically designed to be a long lasting product used as an end stop in non-continuous wall flashing applications. The IPCO End Dam in stainless steel is an important part of the comprehensive IPCO Flashing System, providing another sturdy, long lasting product which ensures continuous moisture barrier protection in masonry walls. The IPCO End Dam in stainless steel will help to divert water back to the weep hole and out of the cavity.

4. Technical Data

Material: Type 304 grade stainless steel, 26 gauge.

Dimensions:

3"x3"x3"

4"x4"x4"

6"x6"x6"

5. Installation

The substrate surface should be cleaned of dust, dirt, and foreign matter. All sharp protrusions should be eliminated and surfaces should be dry. All data sheets and installation guides for the entire IPCO Flashing System should be reviewed and understood by all personnel prior to installation of the IPCO End Dam. The IPCO stainless steel end dam should be installed after the stainless steel drip edge, but prior to the installation of the flashing. The end dam should extend from the bend point on the drip edge at the face of the masonry, past the back face of the exterior wythe, and preferably to the face of the backup wall. For additional information on the installation of the IPCO Flashing Sys-

tem, refer to the IPCO Flashing System data sheet as well as the data sheets for each of the components of the IPCO Flashing System.

6. Availability and Cost

All Illinois Products Corporation products and prices are available through a nationwide network of masonry and building supply distributors.

7. Warranty

The recommendations and properties attributed to the products are based upon what is believed to be reliable information. Illinois Products Corporation warrants materials to be of good quality and will replace unused material proven to be defective. No expressed or implied warranty of installed material is made because satisfactory results depend not only on product quality but also upon factors that are beyond IPCO's control.

8. Maintenance

No maintenance is required after proper installation.

9. Technical Services

Contact the manufacturer for any required technical services. Details and suggested application drawings are available on each individual product data sheet. IPCO Material Safety Data Sheets should be read and understood by all personnel before using the products.

10. Filing Systems

Product information is available from the manufacturer in the following formats: Complete IPCO product line catalog in printed and CD formats

Online access to all data sheets at: www.illinoisproducts.com
